Local Topics.

Miss Venle returned from Lethbridge Monday.

J. E. Partridge took a trip to Lethbridge on Monday.

Mr. and Mrs. G. Bruhring of Winnifred were in town Saturday.

Rev. W. T. Beattie was a visitor to Medicine Hat Wednesday night.

A. W. Doran went to Medicine Hat on Wednesday for the winter.

The foundation of the new Church of England Vicarage was laid this week.

W. S. Donnelly and K. M. Holcroft took a trip to Lethbridge Wednesday.

Mrs. J. Main has just recently opened up another boarding-house at Winnifred.

Messrs. Beattie and Bratton have installed this week a water trough inside their barn.

T. W. Lewis left this week for the coast, where he will probably reside for the winter.

Mrs. S. Davis left here on Wednesday for Lethbridge, where her husband will shortly follow her.

G. R. Howden, our tin-smith here, will shortly leave for the east, and will possibly be away for the winter.

Miss Lottie Hysop of Lethbridge, who has been visiting Mrs. Fred Henderson, returned home on Tuesday.

Mrs. J. Henderson of Lethbridge is here visiting with Mrs. F. Henderson, her husband being down last week end.

Miss Baker of the Hotel Myrtle, who has been very ill during the past few days, is now, we are glad to say, rapidly recovering.

The subject in the Presbyterian Church on Sunday next, August 21st, will be "A drama in three acts," a sermon to young men. Service to commence at 7.30 p.m.

Messrs. Beattie and Bratton are in communication with the post-office department at Ottawa with regard to running a mail service from Bow Island to Altamora.

Mr. Whern, of Moline, Illinois, arrived here on Wednesday morning with a car of settlers effects. His family will arrive later on. At present Mr. Whern is the guest of Mr. Jones.

Walter B. Guion, of the Dominion forestry department, is registered at the Hotel Myrtle. He is just now busily engaged in driving through the country and inspecting those trees that have been obtained by the settlers from the department.

The Southern Alberta Irrigation Co. is placing a ferry across the Bow River about 14 miles northwest of Bow Island, and near the McGregor cow camp. The men with the material are already upon the spot and have started building. The ferry will undoubtedly be much appreciated by the residents of that locality.

The new Methodist Parsonage situated north of town, is now nearing completion, and the Rev. Mr. Wright will shortly be able to take up his residence in a building that is not only a credit to the members of the Methodist Church here, but at the same time is a very fine addition to the many excellent residences we already have in Bow Island.

Mrs. W. A. Fuller was a visitor to Grassy Lake on Wednesday.

Sir Wilfrid Laurier is due at Medicine Hat on September 2, when a big reception will be tendered him.

The Bow Island hotel is now being run under new management, A. F. Foster having bought out Geo. Heuser.

Mrs. Batterbee, the wife of the new proprietor of the livery stable at Burdett, together with two daughters and a son, arrived there from England on Tuesday.

The ruins of last week end have given the farmers around Bow Island all the moisture they want at present, and breaking everywhere is being nervously carried on.

A horse belonging to a farmer out north was found dead the other day with what looked very much like a bullet hole in the neck. The matter is being investigated.

Guy Bowen paid a visit to Burdett last Friday and purchased a main street lot with a store erected thereon. The property was purchased from Mr. Hanswiken through the General Agency.

D. Needham of the Hotel Myrtle has been very sick this week. A bad attack of heart failure at one time threatened to end seriously, but happily he pulled through and is now much better. The doctor, however, has prescribed for him a complete rest.

A cat running around with a tin can tied to its tail is a novelty, where small boys are concerned, but a horse being subjected to the same treatment is entirely a new proceeding. This, however, happened last week recently, the animal being badly cut in the wire fence whilst dashing around. We understand the mounted police are investigating the affair.

The following telegram was received Tuesday morning by Mr. Simpson, secretary of the Board of Trade, Medicine Hat: "Please notify gentlemen interested that there is lots of feed in country north of here. Large amount of hay left meant beginning fifty miles out. Great quantity straw available close in. Good pasture everywhere. Edmonton Board of Trade glad to co-operate in any way in obtaining low rates for moving hay or straw southward. Will afford all possible assistance to parties who may come to investigate situation."—F. T. Fisher, Secretary Board of Trade Edmonton.

The McGregor ranch, situated north of Bow Island, is widely known for the excellence of its products, and there are very few ranches or farms in Western Canada that can equal it. The greatest of care and good management, combined with up-to-date methods, have succeeded in establishing a thoroughly model farm, and hundreds of visitors present themselves during the course of the year to get acquainted with the methods that are there adopted. Their cattle and hogs, especially, are an example of what can be done with well-bred stuff. One of their hogs, of the Chester white variety, was butchered this week by Messrs. Fuller and Smith, and when killed and dressed tipped the scales at 530 pounds, a splendid example of what good feeding and management can accomplish.

ADVERTISING RATES

Transient Advertising such as legal notices, tenders, readers, etc., 12c per line per line each subsequent insertion. Lost, Found, Wanted, etc., 50c for first insertion, 25c each additional one.

Commercial Advertising rates on application. Professional Cards occupying one inch \$5.00 per quarter. Commercial Advertising payable monthly one inch in advance. Four insertions constitute a month except per yearly contract.

To ensure insertion of advertisements and new ads, notification of same must be made to this office before 12 o'clock noon Wednesday of each week. Local items of interest are news, accepted up to each Friday. This rule is not a hard and fast one, but we cannot guarantee insertion after that time. Marriages, birth and death notices inserted free.

NOTICE TO CORRESPONDENTS

We invite correspondence on all matters of public interest, and especially country news, but reserve to ourselves the right to omit any part or all the copy submitted. The name and address of the correspondent must accompany all letters for insertion, though not necessarily for publication.

Country correspondents are requested to have their copy reach the office by Tuesday noon of each week. Contributions arriving the latter part of the week are frequently crowded out, and by the next week some of the news has lost much of its value on account of its age.

JOB WORK

THE REVIEW OFFICE is well supplied with all kinds of type, and is prepared to execute at the shortest notice any job work from the smallest of cards to full sheet posters.

The tree inspector of the forestry branch is in town this week and has been covering a large expanse of country in the performance of his duties. We are glad to hear from him that the interest in tree culture is increasing everywhere, but more especially when we learn of such a large number around Bow Island taking the matter up.

Tree culture is not, as a good many imagine, a hobby. It is a dire necessity. A good plantation protects crops, conserves the moisture, provides fence posts and firewood, shelters the stock, beautifies the home, and adds another \$1500 on to the value of the property. Planting trees is one of the best investments a farmer can make, and when he can procure them for nothing there is no excuse for any settler refusing to invest in this important branch of his business.

The inspector informs us that there is a number around Bow Island applying to the forestry department, and this we are

glad to hear. We want to see the country covered with plantations, and every settler taking an interest in their growth.

CHILDREN'S AID SOCIETY.

A Children's Aid Society or Committee empowered to act under the Children's Protection Act of Alberta should be at work in every town and village in the province to attend promptly to cases of child neglect or cruelty, and to act in the capacity of probation officers or friends to the boys and girls who are in need of the hospital advice that only an older person can give.

The work of the Children's Aid Society is to secure homeless, abused or neglected children at the earliest possible age, from their unfortunate surroundings.

The finding of foster homes for children in need of such homes and the continuing of a watchful care over any children placed in such foster homes.

To protect society against the strongest of its foes—ignorance and vice—by the securing of good home conditions for children who would otherwise grow up under the most pernicious and evil influences.

To urge upon parents the serious

results bound to accrue from the careless training or neglect of their children during the most impressionable years of early childhood.

To see that every child in the community has a chance to grow up to be a good citizen.

The home life of neglected children may be greatly improved by a little kindly intervention; that failing, there is a law in Alberta which protects helpless children from abuse or neglect and it should be appealed to promptly. Homeless children should be taken care of at once and placed either in foster homes or sent to the nearest shelter where they may be cared for until foster homes can be found.

Those interested in the work of the Children's Aid Society or those who know of cases of neglect or cruelty to children, or know of a home where a little child will be welcomed, are invited to write to the Superintendent of Neglected Children for Alberta, Edmonton.

WINDY RIDGE.

Mr. L. H. Bush left Monday for B. C. to secure work.

Mr. Frank Bevan made a business trip to Lethbridge this week.

Mr. J. F. Lamoureux has been on the sick list for a few days.

Born to Mr. and Mrs. E. Still on Wednesday, August 10th a daughter.

Mr. Clifford Presky of Bow Island spent Sunday with his parents on the farm.

This vicinity was visited by a delightful rain Friday which was much needed.

Reverend, O. J. Vibbert and L. Nowak visited Mr. and Mrs. L. H. Bush Sunday.

Miss Nina Presky, Mrs. Anna Beale and daughter Ella, visited Mr. A. Page and family on Sunday.

TO HOMESTEADERS.

The appended telegram is self-explanatory, in connection with the Department's recent ruling whereby homesteaders are granted the privilege of leaving their land during the fall and winter months of this year—

OTTAWA, Ont., August 10, 1910.

To Agent of Dominion Lands, Medicine Hat, Alta.

Regarding the Departmental telegram of the Fourth instant, the protection includes purchased Homesteads but not volunteer scrip entries or any case where cancellation proceedings are pending. The Agent must satisfy himself that the entry is perfected by thirty days continuous residence. The Agent may then grant protection advising the head office.

(Sd.) J. W. GREENWAY.

Will those who wish to obtain the REVIEW regularly kindly send in their names at once.

FOSTER'S FORECAST

Washington, D.C., August 13—Last bulletin gave forecasts of disturbance to cross continent 12 to 18, warm wave 11 to 18, cool wave 11 to 18. The interesting features of this disturbance will be a great hot wave all over the country, drought in the Ohio valleys, excessive rains from Burlington Iowa, to New Orleans; from St. Joseph, Missouri, to St. Louis, from Montreal and Blaine, Maine, along the Atlantic coast, to Charleston, South Carolina, with showers and dry spots interspersed throughout middle and western Canada.

Cotton will suffer from drought in Texas, Oklahoma, Georgia, Alabama, Florida and Cuba, while these rains are falling as above mentioned, during the week ending on Aug. 14. Near Missouri and middle Mississippi valleys the corn crop will be greatly benefited, but in parts of Kansas, Nebraska, the Ohio valleys, it will be seriously damaged. Late and far north spring wheat will hold its own fairly well.

Fourth disturbance of August will reach Pacific coast about 17, cross Pacific slope by close of 18, great central valleys 19 to 21, eastern sections 22. Warm wave will cross Pacific slope about 22, great central valleys 22, eastern sections 24.

The salient features of this disturbance will be dry weather and modern temperatures. While only a few showers are expected, the moderate temperatures will not be favorable to evaporation, and therefore, where drought occurred the week previous, good crop weather will prevail, but where it was dry the previous week the drought of this storm will hurt growing crops.

On Pacific slope this disturbance will cause severe storms about Aug. 17, and at the same time, the previous disturbance will be causing severe storms on the Atlantic coast.

Fifth disturbance of August will reach Pacific coast about 23, cross Pacific slope by close of 24, great central valleys 25 to 27, eastern sections 28. Warm wave will cross Pacific slope about 28, great central valleys 28, eastern sections 30.

All features of this disturbance will be more radical than the one preceding. Severe weather will visit many localities, rainfall will be good, where I have predicted an excess of rain for the month, and the drought will be more severe where I have predicted drought for August.

I am now working on temperatures and rainfall for 1911 and will soon have them completed. Heretofore, I have worked out a full year in advance, but I hope soon to be able to keep it working up fully three years in advance.

This will enable me to announce, through the press, some features of the crop conditions, and to estimate the amount of crop products, from one to three years in advance.

BASEBALL.

Internationale vs. Compositians.

On August 18th the Compositians and Internationals engaged in field of contest at Bow Island.

Internationals.

Compositians.

Cobb Bell (pitcher) Humpy McIntyre (G. Wynne) (catcher) King Smith (Ricker) Sutton (1st b.) Stuck Beattie (Ducko) Hyatt (2nd b.) Partell Hino (Jenny) Lemus (3rd b.) Chester Beattie (Snodell) Fuller (4th b.) Wagner Beattie (Lajoie) Dyer (C.F.) Crawford (M.D.) Turner Watson (C.F.) H. Patterson (Flicker) Reed (C.F.) St. Young Wright (1st base) Stuck Beattie went to bat and swung like a windmill, makes a three batter and takes home on an overthrow.

Partell Hino gets first and Wagner Beattie, the professional from Napan, made a nice single. Crawford (M.D.) was a bit short in the legs, but the ump, called him safe (proten decision). Chester Beattie, another professional from Napan, got a safe call. Professional King Smith also made a hit.

St. Young Wright gets a base on balls. Patterson died on first from a dose of his own doing. Lajoie Dyer made a nice stop owing to the ball striking his No. 11s. Hopy McIntyre made a nice hit, but tried to take too much and died on 3rd.

Second half. Flicker Reed takes a good swing, but dropped before he got to first. Ricker Sutton connected and sent a two-bagger to centre field. Shifty Gordon made a good one. Crawford Lemus made some awful plays at 1st, but Humpy McIntyre fooled him. Shifty Gordon would have got Partell Hino if he had some molasses or even put in his mitt. But Cobb Bell put Hino to the bat before he got first. Ricker Sutton took a hot one from King Smith's bat. Dyer went to the bat and swung fine, but couldn't get started quick enough. Big Watson. Fuller got a good one, but Hino couldn't hold it. Turner Watson died at the bat while swinging fine. St. Young Wright plugged it. Reed and Bell made a wild throw and let him loose, and he ran

like, well—we will tell you next time. Flicker Reed tried a Marathon stunt, but we didn't notice any later straining ropes in his path. Chester Beattie made a stop, don't know how, but one lady said the ball stopped rolling. Dyer fanned again, he meant well, but all arguments are denied that he said the game, which eventually ended by the umpire making the score 17 to 15 in favor of the Internationals.

Owing to the drought in N. Dakota the farmers will save all the straw from threshing, in order to carry enough feed for the cattle during the winter. Every fall it is the custom to destroy this by fire, but this season every scrap of feed will be saved in North Dakota as it has a value. The hay crop all the western states is very short. Millet and fodder have been grown in many farms and some grain has been cut for feed. But this will not overtake the short crop of hay.

CULTURE OF WINTER WHEAT.

The following is taken from the report of Mr. W. H. Fairfield, superintendent of the experimental farm at Lethbridge, for the year ending March 31, 1909, and from which we gave an extract in our last issue. Regarding winter wheat he says:

As there are a great many letters being received asking for information concerning the best method of cultivation for winter wheat, when to sow, the quantity of seed, etc., a brief outline of the methods in vogue in this district is hereby given.

Although a winter wheat known as Odessa has been grown in the Cardston and Pincher Creek districts for the last twenty years or more, the first hard winter wheat raised on a commercial scale was not sown until the fall of 1907, when Mr. E. E. Thompson, then of Spring Valley, imported a car of Turkey Red from Nebraska. Although there have been further importations of the same kind of seed into the province, most of the four million odd bushels threshed this past season are from that first car of seed.

For seven seasons this wheat has been sown from July to December, the seed varying in quantity per acre, from two pecks to six pecks and more. Naturally, some failures have been met with, but one important fact has been established beyond question, that the district is peculiarly adapted to the growing of hard winter wheat. Of the details, such as the best mode of preparing the ground, the best time to sow, and the right quantity of seed to use, much is still to be learned. In all agricultural experiments, the average of a number of seasons is required before reliable conclusions may be drawn.

PREPARATION OF THE LAND.

If soil is to be used, it should be broken in May and June, while the soil is moist and before the rainy season is over. May breaking usually gives better results than June breaking. The soil should be rolled or flattened down as fast as it is broken, to facilitate the rotting process. It is the custom to break to 3 or 4 inches deep and prepare a seed bed by the use of a disk, drag harrow and float. The latter is a contrivance of four or five two inch planks a foot wide, 12 to 16 feet long, laid flatwise and lapped to resemble somewhat a washboard. This implement, when weighted with stone or sods added to the weight of the driver, crushes quite effectively small pieces of which, when dry, could not be broken up by the drag harrow. The float should be followed immediately with the harrow, for compaction takes place very rapidly from the land when the surface is left too smooth. If the floating is done just before seeding, the seed-drill will, of course, roughen the surface. A light harrowing immediately after seeding is advisable.

BACKSETTING.

Although it is not customary to backset in this district, it is a practice that cannot be too highly recommended. When backsetting is to be done, the sod should be broken as shallow as practicable and immediately rolled or flattened down by a weighted float. The earlier the breaking after the grass has started growth, the better will be the results. In the latter part of July or early in August the land is again ploughed (with stubble being ploughed) about 2 to 3 inches deeper than before. A seed bed can then often be prepared by the use of the harrow only, but a disk should be used if the condition of the ground requires it. Special attention should be called to the importance of harrowing each day's ploughing at night before leaving the field. If an engine is used, the harrow should be attached to the plough, or if horses are used on a sulky or gang plough, one section of the harrow should be attached so that the land is harrowed as fast as it is turned. In fact, this practice of harrowing the land immediately after it is ploughed should always be followed. Too much stress cannot be laid on this point.

TIME TO SOW.

Although our results for this season would indicate that September 1 is the best date to sow, this is one of the questions that will require some further years' experience and observation before a reliable opinion can be offered.

QUANTITY OF SEED TO SOW.

This, as well as the proper time to sow, is a point about which we have not sufficient data at hand to draw satisfactory conclusions. It is reasonably safe to assume that this sowing will fill better in a dry season, while in a normal or wet season, medium to heavy seedings will fill equally well, besides producing a larger yield. It is not wise to go to extremes either way. Thirty to 60 lbs., or 45 to 60 lbs., is probably the approximate amount to sow per acre.

TREATING FOR SMUT.

Winter wheat should be treated for smut just as conscientiously as in spring grain. Either the formalin or bluestone method is satisfactory, providing that the work is done carefully. Every smutty grain should never be used for seed, for even when sown

thoroughly, some smut is apt to appear in the resulting crop. If seed wheat is treated every year, whether any smut can be found in it or not, the trouble will be kept in subjection. With either method used, it is important that such kernel be thoroughly wet. As to the strength of the solution, it should be strong enough to kill the smut spores, but not so strong as to injure the vitality of the grain. The strength of solution most often recommended is one pound of formalin in 25 gallons of water, and in the case of bluestone, one pound thoroughly dissolved in 6 gall. of 4 water. The sacks into which the grain is to be put after it is treated should have been dipped in the solution also.

HARROWING THE CROWING GRASS.

The land is not apt to become crusted in the fall, but should it become so in the spring after heavy rains, it is commendable practice to harrow it.

FRIDAY'S BIG STORM HORSES THUNDERED.

A very heavy thunderstorm, accompanied by much lightning and a terrific downpour of rain, visited Bow Island on Friday night. The rain itself did an incalculable amount of good and has greatly improved the spirits of the residents after the long spell of hot weather.

Among the incidents connected with the storm, was the stampeding of a bunch of horses about 100 head caused probably by the sharp lightning. The stock belonged to Messrs. B. T. Whitney and N. Walworth, and included some very fine horses among their number. The stampede started about a mile and a half north of town on the school section and finished up near the C.P.R. water tank, the horses being driven into the water and some being hurt. The horses were being driven to the water tank for the purpose of watering them, but three miles of wire fencing cut them off from the water tank. Mr. T. A. Rose, who lives north of town, had three miles of wire fencing cut down, the horses being fearfully cut in the process. As a result of the stampede, one dead and about forty more animals are more or less badly injured.

CHARGE OF ASSAULT.

Two young men from Burdett, named Vents and Leo Boe, were here on Sunday visiting their brother-in-law, Mr. Halpine, and during their stay endeavored to obtain a loan of money. They were unable to procure one, and in consequence, proceeded to make things rather interesting for their relatives.

As a result of the fracas a charge of assault was made out against them, and on Tuesday, Serg. Harper, of the R.C.N.M.P., laid them up before J. P. Wells, J.P. Two charges of assault were preferred against Vents, one of assaulting Mr. Halpine, and another of assaulting Mr. Russell, on each of which fine of \$5 and costs was imposed. Leo had only one charge to plead to and upon this he was fined \$2 and costs. Both men were also bound over to be on good behavior for twelve months.

TEAMS FOR REGINA.

Mr. D. Needham, of the Hotel Myrtle, has been interesting himself this week in procuring employment for a number of men and teams from Bow Island to work on the C.P.R. grading at Regina. He has been endeavoring to secure about 50 teams, and up to the present has obtained 25, three leaving here on Wednesday night en route east.

The rate of pay is from \$5.50 to \$7.50 per day with everything furnished, including free transportation.

A comet discovered this week by Rev. J. H. Metcalf, of Taunton, Mass., has been observed from the United States observatory at Washington, and has been photographed at the Harvard College observatory.

At five o'clock on Monday evening, an electric storm accompanied by a heavy shower of rain and hail, with hail stones of considerable size, was experienced. The damage to crops is not yet known, but the latter cannot fail to be heavy.

Canadian steers at Liverpool (Eng.) last week were sold for 12s to 14s and ranch steers from 12s to 12s per head.

Wanted.
Horses and Cattle to pasture this fall and winter. Have got one section under fence and three sections to graze over in good weather, with abundance of grass, water and in 800 sq. ft. of Seven Persons, price \$25.00 head per month. For full information write Walter A. Dupp, P.O. Box 62, Seven Persons, Alta.

Tenders Wanted.
Tenders will be received up till Saturday, September 10, by the City of Regina School Board (No. 201, Prince of Albert, for coal. Said coal to be first class large and small, well seasoned. First two tons to be delivered in stockpile before October 1. The most as needed.
J. A. Under, Sec. Treas.

ADENTAL OFFER WITHOUT A PARALLEL

MADE BY DR. HERBERT LAKE OF TABER.
The best set of teeth that skill can make or money can buy.
\$12 TWELVE DOLLARS \$12

There can be no better, for the best of materials and the shrewdest skill enter into their composition.

A Twentieth Century Plate of Artificial Teeth

Fully warranted as to quality, and guaranteed as to fit. The same plate in Lethbridge would cost \$35.00 and in Calgary \$30.00. This is the best offer I have ever been able to make my patients, and I have been serving for fifteen years. The other day in Spokane I was buying dental steel. The dealer made some special prices for cash, for they need it over there the same as we do here. I asked him fifteen minutes and at the end of that time I had secured the 100 sets at a figure that makes it possible for me to sell these plates to the public of my district at the above price and still make a good living profit. There are only 100 sets, but they are the choice. Not only I pick them as I need them. The mountings for these plates are in gold dust or orange rubber. They will be made to fit, look natural, and restore the features. My name, reputation and skill are behind them. Every plate will be made by myself, the assistant doing only the mechanical work. I want to start to make them up again, the 15th of August, and the first one will be the first served. If you cannot get into Taber just now, I will send the coupon at the bottom of this advertisement, and send it to my office. I will be sent you, and your choice of teeth retained. This is the last offer I can make to make to you this year.

The Big Dental Office, Taber, The Inlay System of Dentistry, DR. HERBERT LAKE.

Coupon "D"—DR. LAKE, Manager "The Inlay Dentist," Taber, Alta. Dear Sir:—Enclosed please find \$5.00, for which send me a receipt, and give me credit on your special offer for a set of Twentieth Century teeth at \$12.00 a set. I will be in your office about the 10th of September.

Signed: _____
